

102ND RICHMOND COLLEGE SENATE

**A RESOLUTION FOR THE ENHANCEMENT OF THE
UNIVERSITY'S IMAGE**

WHEREAS spiders have two body segments: the cephalothorax and the abdomen,

WHEREAS ticks have one body segment: a fused cephalothorax and abdomen,

WHEREAS both spiders and ticks have eight legs and large mouthpieces,

WHEREAS the current logo for the "Richmond Spiders" has one body segment,

RECOGNIZING the current logo for the University is in fact a tick instead of a spider,

BEARING IN MIND we currently have a blood-sucking parasite as the face of the University,

Resolved, that the RSCGA –

(1) RSCGA encourages the logo to be changed into a spider and grandfathered in to the University over time.

On this 13th day of September 2017;

Abbas A. Abid
President

Jonathan C. Hayes
Speaker

Joseph Boehman, Ed.D.
Dean
